PROJECTS

ThreatGuard | *Personal Project* January 2024 - Ongoing
- Threat Guard is designed to be a straightforward solution for protecting systems from malware attacks
- The real-time file monitoring feature constantly scans file accesses, examining them for any signs of malicious activity.
- It is designed to operate efficiently in the background, minimizing resource consumption and avoiding any negative impact on system speed or responsiveness.
- The user interface of Threat Guard is intuitive and easy to navigate.

Platform as a Service | *Academic Project* December 2023 – Present
- Developed a Private Cloud Model for Simplifying application development and deployment by providing a comprehensive cloud computing solution
- Our Project eliminates the need for managing the underlying infrastructure, allowing users to focus solely on application development
- Ensures security and compliance through built-in security features and adherence to industry standards.
- Provides a range of development tools, frameworks, and libraries to accelerate the development process.

PersonaSphere | *Personal Project* March 2023
- Developed seamless project in ReactJS with dynamic and responsive user interface.
- Offers personalized chat rooms tailored for various purposes, including team collaboration, customer support, and social interaction.
- Supports real-time messaging with features like instant message delivery, read receipts, and typing indicators.

EXPERIENCE

ZeroThreat Security Solution Limited | *Position : Junior Security Analyst* January. 2024 – Present

- Assists in monitoring security systems such as intrusion detection systems and firewalls
- Performing security audits in organizations to assess and improve their security posture.
- Analyze security logs and alerts to identify potential threats and vulnerabilities.
- Documenting security incidents, investigations, and resolutions.

Hoddypapa Information Private Limited | *Position: Data Analyst Intern*   June. 2023 – July. 2023

- Collected, cleaned, and preprocessed raw data from various sources.
- Conducted exploratory data analysis to discover trends, patterns, and insights.
- Utilized programming languages (such as Python) and data analysis tools (like SQL or Excel) for data manipulation and analysis.
- Ensured thorough documentation of data analysis methodologies, processes, and findings.

VOLUNTEERING

Chief Student Corporate Relations Head | *Training & Placement Cell DYPCET*   January 2024 – Present

- Facilitate internships, recruitment drives, and industry collaborations to bridge the gap between students and employers.
- Organize networking events, coordinate placements, and offer career guidance to students.
- Leverage negotiation and communication skills to foster mutually beneficial relationships with corporate partners.
- Engaged with alumni and industry leaders to stay updated on emerging trends and collaboration opportunities, ensuring the college stays ahead in technology and industry practices

Event Management Lead | *Google Developers Students Club DYPCET*   April 2022 – April 2023

- Oversee planning, coordination, and execution of events and activities.
- Organize workshops, hackathons, networking sessions, and guest speaker events.
- Collaborate with club members and stakeholders to create impactful experiences.
- Focus on innovation, creativity, and inclusivity in event planning.
